

Ann Mennonno works as a second grade teacher at Clarks Creek Elementary school. On top of her hard work as an educator, she is also the coordinator for ELL students. ELL stands for English Language Learners. Mrs. Mennonno received a grant from Plainfield's Legacy Foundation to help the children at Clarks Creek learning English as a secondary language. There are roughly forty students at Clarks Creek trying to improve their English speaking skills. This grant has allowed Mrs. Mennonno to purchase learning materials and games to help teach the children. This is extremely important for students learning the English language as it helps build their vocabulary and their communication skills. All of these materials have been made available to all of the teachers to help their students. With the help of this grant Mrs. Mennonno is helping students further their education at Clarks Creek Elementary.
